Dr. Shirley Ann Jackson: Beyond the Price at the Pump: A Comprehensive Energy Security Roadmap

Thursday, Nov. 20 at 7:00 p.m.

<http://www.msichicago.org/whats-here/events/members-feature-lecture-with-shirley-ann-jackson-phd/>

American physicist Shirley Ann Jackson, Ph.D. has been the president of Rensselaer Polytechnic Institute since 1999. Described by Time magazine as "perhaps the ultimate role model for women in science," and appointed Chairman of the U.S. Nuclear Regulatory Commission (NRC), 1995-1999, Dr. Jackson has held senior leadership positions in government, industry, research and academia. Describing her as "a national treasure," the National Science Board selected Jackson as its 2007 recipient of the Vannevar Bush Award for "a lifetime of achievements in scientific research, education, and senior statesman-like contributions to public policy."

Come hear Dr. Jackson speak about the current energy crisis and the fight to keep the U.S. competitive in the global research environment by engaging more American students from diverse backgrounds in science and technology careers.

Field: Cancer Research/Oncology, Genomics, Genetics, Molecular Biology, Bioinformatics

* Posted Date: Tuesday, November 18, 2008 5:17:37 PM

Postdoctoral positions are available in the laboratory of Dr Tony Godfrey (www.tonyegodfrey.net) at the University of Rochester Medical Center. Research in the lab is translational and combines surgeons, pathologists medical oncologists and industry partners to address important clinical questions using modern molecular technologies. Current projects include integrated genomic analysis of esophageal adenocarcinoma using Affymetrix U133 expression arrays, 6.0 SNP arrays and custom miRNA expression arrays. In addition, we are studying the role of bile acid reflux and CDX2 and miRNA gene expression in the development and progression of Barrett's esophagus. The goal of these projects is to identify therapeutic, predictive and prognostic markers and to gain a better understanding of the biology of these tumors.

Successful applicants will be expected to lead/contribute to ongoing projects but will also be encouraged to develop their own ideas within the general interests of the lab.

Applicants should submit a CV, a letter outlining their career goals and areas of research interest and

contact information for three references.
